

Table. Objectives of systematic Mapping.

Objectives	Description
O1	Provide basic information, delimit the scope from a demographic perspective and allow the identification of relevant sources of information and research in the field of work related to the harmonization between Scrum and the ISO 9001 standard, the Colombian technical standard NTC 6001 or its variants in other Latin American countries that are derived from the ISO 9001 standard.
O2	Help researchers and interested parties to know the quality, validation, processes and methods used by the authors of the studies found.
O3	Identify the state of development of the proposals in terms of the results obtained.
O4	Identify the main research trends, future work and work in progress related to the harmonization between Scrum, the ISO 9001 standard and / or the Colombian technical standard NTC 6001 or its variants in other Latin American countries that are derived from the ISO 9001 standard.
