Tabla. Research type.

Research type	description
Validation Research	This type of article investigates the properties of a solution proposal that has not yet been implemented in the practice of requirements engineering, the proposal to be evaluated may be its own or that of another author.
Evaluation Research	Refers to the investigation of a problem in requirements engineering practice or an implementation of a requirements engineering technique in practice.
Proposed Solution	This type of article proposes a solution technique and defends its relevance, without a complete validation. The technique must be novel, or at least a significant improvement on an existing technique.
Philosophical Articles	These articles show and devise a new way of looking at things, a new approach.
Opinion articles	In these articles the author expresses his opinion on a specific topic, highlighting what is right and wrong, suggestions on how something should be done.
Experience Articles	In these articles, the emphasis is on the what and not the why, it deals with the author's personal experience. The results should contain a list of lessons learned by the author from his experience.
